

Meeting MIL-STD-130 & MIL-STD-129

The US Government requires anyone who ships product to the DoD comply with strict mandates for labeling pallets, cartons and products to enhance the accuracy and rapid response capabilities of our military.

Deadlines are being enforced, and regulation details are numerous. Mandates are changing; making it difficult for some to comply and others to know when they are truly in compliance. Those who are not ready or are found to be non-compliant face the possibility of incurring high penalties, delayed shipments and loss of contract business.

Know your options, how to get in compliance quickly and easily and be sure your business is protected. Winco ID and our partners offer a resource of compliance solutions. This seminar will show you what you need to know to meet Military Labeling Standards and make the right choices for your success.

*Call 1-800-325-5260 X266
to register or visit us online at

Demystify DoD Labeling Standards

September 23, 2010

9:00 am - 1:00 pm
Southborough, MA

Meet industry leaders with first-hand experience with RFID technology, UID implementation and compliance solutions for DoD Suppliers and Subcontractors. This session is focused on helping you comply with the labeling requirements of MIL-STD-130 and MIL-STD-129 and managing your workflow. In just a few hours, you will learn:

MIL-STD-130 - UID and Product Labeling

- What is UID, Deciphering the UID Code, Printing the UID Code, and the UID Registry.
- UID QC and how to be sure your marks are in full compliance.
- ABC's of validation and verification and why it's important.

MIL-STD-129 - Shipping, Pallets and Cartons/RFID

- What changed in Change 4?
- What you need to do to meet requirements including RFID.
- Unit Level Packing Requirements.
- RFID Labeling on difficult products (metal, irregular surfaces, etc.)
- RFID Asset Tracking.

Data Management Requirements

- Unifying the UID and RFID workflow process into your existing business processes.
- Avoiding electronic submission costs.
- Software solution that fully integrates RFID, UID, WAWF and the UID Registry.
