

Keep Track of Your Assets with RFID

In today's mobile and fast-paced business world, it's harder to keep track of who has what and where things are. Asset Tracking Systems have become a valuable tool used by companies of all sizes, government, educational, healthcare organizations and others to help prevent loss and find critical equipment when needed.

With the addition of RFID technology, you can:

- Save up to 75% of your time taking fixed asset inventory.
- Reconcile an entire room at once using a mobile device.
- Save even more time when looking for items.
- Improve data security - RFID tags provide better data protection.
- Eliminate sore knees and backs from bending and searching.

Winco ID provides the complete solution for your asset tracking needs. Our Starter Kit will get you going quickly and easily with powerful software to handle the demands of your business yet simple enough to use right out of the box!

WINCO ID'S ASSET TRACKING STARTER KIT

- IntelliTrack Fixed Asset Software - One Licence
- Motorola MC9090 RFID Hand-Held Mobile Computer
- RFID Asset Tracking Labels
- One Year of Technical Support

With RFID, you can identify assets in an entire room at once because line-of-sight scanning is not required.
