

Citronix Ink Packaging Changes

As part of our process of continuous improvement, the fluids for your Citronix printers are going to have new, redesigned packaging.

The new bottle is larger (750ml, compared to 473ml in the old round bottles) and a different shape to the one you are used to- rectangular instead of round. The formulation of the fluids remains unchanged and the complete range is still available- see part number matrix on the next page.

Fluids will be shipped in cases of 6 of the 750ml bottles.

Benefits of New Package

- Larger size for fewer printer replenishment touches
- Rectangular shape is more efficient for case packaging & shipping costs
- New product labeling is GHS compliant
- Compatible with both Legacy and ci3000 Series printers

Part Number Chart for Old and New Packaging

Ink Part Number Old	Ink Part Number New	Description
300-1001-002	302-1001-002	MEK Black Ink
