

## Model 252A

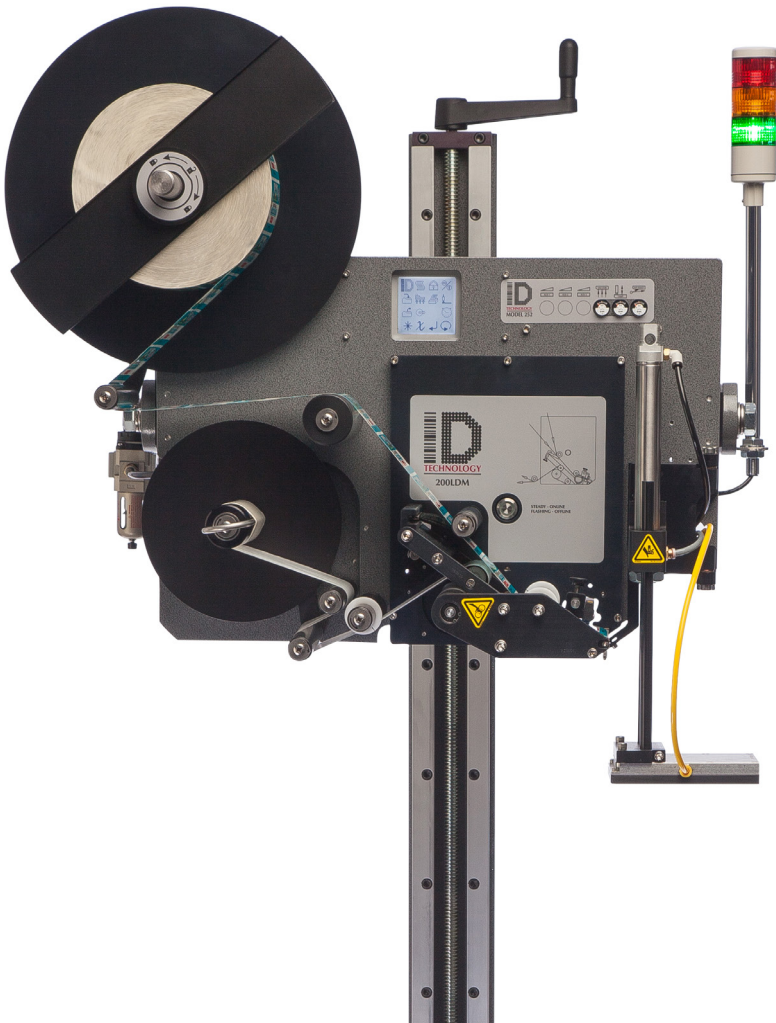

the flexible upgradeable label applicator

You need to apply pre-printed labels to your products today, but might need to print variable information and barcodes in future?

The Model 252A Label Applicator could be just what you need.

The 252A uses ID Technology's apply-only Label Dispense Module in place of the customary OEM print engine.

When you need to add printing in the future, just remove the label dispense module and replace with the thermal print engine of your choice.

## Model 252A

the flexible upgradeable label applicator

These days business is all about change- today's requirements might be very different by tomorrow. How can you know what changes to the labeling of your products might be needed over the next few years?

ID Technology's Model 252A provides peace of mind by being the most flexible and upgradeable labeling system on the market.

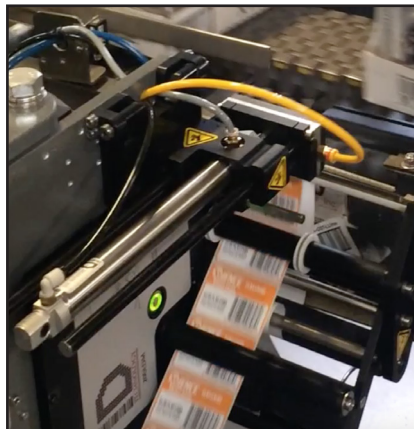

Based on the #1 selling 252 modular platform, the 252A is designed to be able to handle just about every labeling job that uses pre-printed labels. Need to upgrade to print & apply later? No problem; this system is compatible with thermal print engines from the three major manufacturers.

In addition, the 252A can use any of the extensive line-up of ID Technology applicator modules:

- Tamp & Tamp Jet
- Swing Tamp
- Wipe-On
- Dual Panel
- 3-Panel for pallet labeling

*The Label Dispense Module is designed to be a direct replacement for an OEM print engine*
