ID See!

insight into your labeling & coding

Supply chain control, customer needs, serialization, regulatory requirements- the barcodes and data you print on your products and packaging are crucial.

How do you know everything is encoded correctly and meeting the quality standards?

ID See! is the suite of barcode control solutions from ID Technology that gives you insight into your labeling and coding. Designed around the latest scanning and OCR technology from Datalogic to be simple to use in just about any barcode and product coding application.

It's that simple!

ID See! Linear for your GS1 barcoding

ID TECHNOLOGY®

Labeling Coding and Marking Specialists

ID See! provides everything you need to have insight into the barcoding and printing on your packaging lines.

The ID See! system is complete with; Datalogic scanner, product sensor, IO connection box, light stack and mounting hardware.

ID See! can be integrated into a new ID Technology labeling or coding system, or can be mounted elsewhere in your packaging line- wherever you need to be able to accurately scan and the monitor the quality of your barcodes.

Three versions of ID See! are available:

ID See! Linear

Uses a Datalogic DS2400N series scanner, designed to read all linear barcode symbologies. This is a great solution for ensuring compliance with GS1 standards, both for readability and keep track of any loss of quality.

Both standard and raster type scanners are available.

ID See! Matrix

Upgrading to the Datalogix Matrix allows for higher speeds, more in-depth quality control and the ability to read 2D barcodes such as Datamatrix and QR code.

ID See! Matrix is a great choice for medical device marking applications (both on packaging and DPM), industrial DPM validation and anywhere needed to accurately read linear and 2D barcodes.

Matrix 2D Barcode Scanner

ID See! OCR

Our OCR package is the ultimate in print control for ensuring your products are in compliance with serialization, customer and regulatory requirements.
ID See! OCR is built around Datalogic's Impact+ platform and can inspect up to 4 text fields and a barcode on every package you produce. We integrate the system into ID Technology's IPC touchscreen interface to provide you with complete control.

ID See! OCR can be used with thermal, inkjet and laser technology to give you maximum insight into the printing in your packaging operations.

Which ID See! solution is right for you? Contact us today and we'll get you in touch with one of our specialists, right in your area. We will work with you to determine the perfect solution to meet your requirements.
