

The Series 1500 Automatic Wrap Labeling System is designed with production in mind. Using a conservative design approach combined with premium components, the Series 1500 is a system that can be relied upon for *maximum* uptime and *minimal* downtime. The three point applicator design is ideal for applications that required orientation of the product or when the label used is exceptionally long.

#### FEATURES AND BENEFITS:

- Conservative design approach components used well within their ratings
- Modular Construction w/ Stainless Steel and Aluminum Components
- Engineered, manufactured, assembled and tested by LSI's In-house design
- Non-proprietary PLC controls Reliable and Flexible
- Stepper motor driven labelers for precision and repeatability
- Sealed bearings requires no lubrication.
- Aluminum & stainless steel set construction no corrosion
- Fully supported Urethane drive roller no wear & consistent tracking
- AC system drives longer life & less downtime
- Auto Teach label sensing
- Infeed Systems such as the Spacer Wheel, Dual Spacer Belts or Timing Screws
- Rigid mounting of the labeling head(s) for high accuracy labeling
- 50 recipe storage locations, for easy set-up and repeatable product change over

Three Point Wrap Station for High Labeling Accuracy.

# **Specifications** Series 1500

#### SPECIFICATIONS

#### Performance

- Speed
- up to 60 per minute
- Accuracy +/- 1/32

### **Product Specifications**

- Type
  - Straight sided bottle, vials, can or other cylinder type
- Diameter
- 1/2" min to 8" max
- Height
  - 1" min to 14" max

#### Label Specifications

- Roll Size • 12" O.D. on 3" core
- Material
- Film or paper

#### Infeed Options

- Type
  - Spacer Wheel, Dual Spacer Belts, Infeed Screw

#### Conveyor

- Type
  - Aluminum plate Delrin chain
  - Avail. Lengths
  - 5.5', 8.0', 10.0'
  - Widths **3**", 4.5", 6
- · Heights +/- 2"
- 28", 32", 36", 40", 44"

#### System Frame and Head Mounting

- Type
  - Fully integrated aluminum/steel frame,
  - leveling pads std. and castors optional

#### Utility Requirements

- Electrical
- 115v 60 cyl 10 amp
- Air
  - None (some options may require air)

## Series 30

The Series 30 is an apply only model that features a fixed 5" web width, 12" OD and dispense speeds up to 400 IPM.

Series 40

Series 20

The Series 40 is LSI's full featured

apply only head with

standard dispense

speed of 1000 IPM

The Series 20 is

LSI's Print & Apply model. Virtually any

**OEM** print engine

Zebra and Datamax

can be used

including Sato,

and up to 2400 IPM.
